LLAMAS, LOIS JAIRAM B.

Registered Civil Engineer | Office Engineer | QA/QC | Project Coordinator

Bulacan, Philippines 3022 | lsjairam@gmail.com | +63 918 658 1985

Professional Summary

Civil Engineer with hands-on experience in **construction project coordination, office engineering, document control, QA/QC, cost monitoring, subcontractor coordination, and technical documentation** for building projects.

Experienced in coordinating between project management, site operations, consultants, subcontractors, suppliers, and office teams to ensure that technical information, drawings, approvals, billings, and construction requirements are properly communicated and documented. Skilled in reviewing plans, monitoring RFIs/RFAs/submittals/NCRs, preparing technical correspondence, tracking drawing revisions, assisting with cost and billing documentation, and supporting site quality and progress monitoring.

Strong interest in **construction project management and coordination**, with particular strength in translating technical construction concerns into clear, actionable information for project stakeholders.

Core Competencies

- Construction Project Coordination
- Document Control and File Management
- RFI / RFA / RFQ
- NCR Monitoring & Corrective Action Planning
- Drawing & Revision Control
- Architectural / Structural Plan Review
- Subcontractor & Supplier Negotiation & Coordination
- Progress Monitoring
- Quantity Billing & Verification
- Cost Control Support
- Method Statements & Technical Correspondence
- Meeting Minutes & Coordination Reports
- Punch listing & Inspection
- Construction Scheduling
- Materials & Work Inspection
- Site Coordination

Professional Experience

Total Safe Development Construction Inc. – Document Controller / Office Engineer

June 2025 – Present

Support the technical, administrative, quality, and coordination requirements of multiple active construction projects.

- Manage and maintain project documentation including **RFIs, RFAs, material and shop drawing submittals, NCRs, inspection records, technical letters, permits, and drawing revisions**.
- Coordinate technical concerns among **project managers, site engineers, consultants, subcontractors, suppliers, and office personnel**.
- Review architectural, structural, and MEPF drawings for discrepancies, revisions, constructability concerns, and possible conflicts prior to execution.
- Prepare RFIs, RFAs, technical clarification letters, notices, method statements, and formal project correspondence.
- Monitor drawing revisions and ensure that relevant personnel are working from the latest approved information.
- Assist with **QA/QC inspections, punch listing, defect documentation, corrective-action monitoring, and closeout requirements**.
- Coordinate subcontractor accomplishments, work schedules, manpower requirements, pending works, and technical submissions.
- Support preparation and verification of **subcontractor billings, accomplishment reports, quantities, and cost-control documentation**.
- Prepare meeting minutes, coordination reports, trackers, schedules, and follow-up registers for outstanding project concerns.
- Coordinate with suppliers regarding materials, concrete deliveries, testing requirements, technical specifications, and site requirements.
- Assist project management in evaluating site issues and developing practical solutions that consider **quality, schedule, cost, and constructability**.
- Communicate technical construction issues in clear terms to project stakeholders to support timely decision-making.
- Maintain organized records for project approvals, correspondence, inspections, and turnover documentation.

Project Exposure

2 – Units 3 – Storey Dormitory Building
Location: Brgy. Tambubong, San Rafael, Bulacan
Owner: Tai-Group Realty and Development Corp. | Koten Enterprise Co. Incorporated
Architect: ADGO Architecture and Design Inc.
Management: ELS Consultancy & Management, Inc.
Contractor: Total Safe Development Construction Inc.

2-Storey Warehouse Building
Location: Lot E13 – E17, Jolly Industrial Park, Plaridel, Bulacan
Owner: Riken Motors Sales Inc.
Architect: O'yek Designs
Contractor: Total Safe Development Construction Inc.

Internship Experience

Department of Public Works and Highways
Bulacan 2nd District Engineering Office – Planning & Design Section
Bulacan, Philippines

- Assisted engineers in preparing and reviewing drawings for road and flood-control infrastructure projects.
- Performed AutoCAD drafting and revisions based on engineering requirements.
- Participated in site visits, inspections, and field verification activities.
- Assisted with surveying and collection of field information used for project planning and design.
- Gained exposure to government infrastructure planning, engineering documentation, and construction processes.

Education

Bulacan State University – Malolos, City (Main Campus)
Bachelor of Science in Civil Engineering
Specialized Subjects:

1. HRW – Water Resources Engineering
2. TRE – Transportation Systems, Planning, and Design
3. CEM – Construction Engineering and Management (Construction Cost Engineering)
4. STE – Structural Engineering (Computer Softwares in Structural Analysis)
5. GGE – Foundation Engineering

Licenses & Certificates

- PRC Registered Civil Engineer -
Professional Regulation Commission – Philippines (PRC ID: 0220228)
- Driver's License -
Land Transportation Office – Philippines (Expiry: 20/10/2036)
- Safety Officer 2 –
Issued by 1BESO Management Consultancy Services (Certificate ID: BCOSH23B29Z-26)
Accreditation No.: 1030-061724-0127
- MS Project Professional Training and Workshop: Project Scheduling, Resource Management ,and Cost Control –
Issued by XStructures Engineering Consultants (Certificate ID: 2026-PSMSP-W2B-012)
Accreditation No.: OCE-2018-054-3190
- Planswift Training & Workshop: Digital Quantity Takeoff and Cost Estimation –
Issued by XStructures Engineering Consultants (Certificate ID: 2026-PSMSP-W2A-012)
Accreditation No.: OCE-2018-054-3189
